

The criteria Kings College Guildford uses to award and allocate word processors for examinations

“A member of the centre’s senior leadership team must produce a statement for inspection purposes which details the criteria the centre uses to award and allocate word processors for examinations.” [AA 5.8]

The ‘normal way of working’ for exam candidates, as directed by the head of centre, is that candidates handwrite their exams. An exception to this is where a candidate may have an approved access arrangement in place, for example the use of a scribe/speech recognition technology.

Awarding word processors

There are also exceptions where a candidate may be **awarded** the use of a word processor in exams where he/she has a firmly established need, it reflects their normal way of working and by not being awarded a word processor they would be at a substantial disadvantage to other candidates. These exceptions might include where a candidate has, for example:

- a learning difficulty which has a substantial and long term adverse effect on their ability to write legibly
- a medical condition
- a physical disability
- a sensory impairment
- planning and organisational problems when writing by hand
- poor handwriting

Short-term use of a word processor may be awarded when an injury renders a candidate temporarily incapable of hand writing their answers.

Allocating word processors

Appropriate exam-compliant word processors will be **allocated** by the IT department in liaison with the SENCo and the exams officer. In exceptional circumstances where the number of appropriate word processors may be insufficient for the cohort of candidates approved to use them in an exam session, the cohort will be split into two groups. One group will sit the exam earlier than or later than the published start time. The security of the exam will be maintained at all times and candidates will be supervised in line with section 20 of ICE.
